

TalkToMood & PyMood

Moodle® Trademark Review Pack

Live application screenshots · AdaptiveLearn campus via Moodle Web Services

Prepared for Moodle Pty Ltd trademark evaluation · July 2026

Important: TalkToMood and PyMood are independent products by OCA-I / AdaptiveLearn. They are **not** official Moodle products and are not affiliated with or endorsed by Moodle Pty Ltd. Moodle® is a registered trademark of Moodle Pty Ltd. The Moodle name is used only to describe interoperability via documented Web Services REST APIs.

Author: Pablo Díaz · OCA-I.NET · AdaptiveLearn

1. Purpose

This dossier provides Moodle Pty Ltd reviewers with one-click access to the live applications, screenshots of the real product interfaces connected to a Moodle 5.2 campus, and a short visual walkthrough. Screenshots show the application UIs (/app/), not marketing landing pages.

2. Private one-click access (no registration)

Secure links for trademark evaluation. Live data from **<https://adaptivelearn.es/campus>** via Moodle Web Services.

1 · TalkToMood (chat app, live API)

<https://talktomood.com/app/?review=KnSN9LXgEfhr8zg1FpM4JwOiGV2j8pjPXnbH3rZ1g-A>

2 · PyMood (analytics dashboard, live API)

<https://pymood.com/review/KnSN9LXgEfhr8zg1FpM4JwOiGV2j8pjPXnbH3rZ1g-A/>

Captured evidence: Moodle **5.2.1+**, sitename **AdaptiveLearn — Campus IA**, mode **LIVE**, engine **Moodle REST API**.

3. How the products use Moodle

Both products call standard Moodle Web Services (REST) with a server-side service token. They do not redistribute Moodle core and do not fork Moodle PHP. TalkToMood is a natural-language assistant over the Moodle API. PyMood is a Python analytics bridge (CampusYear KPIs, courses, users).

4. TalkToMood — live application

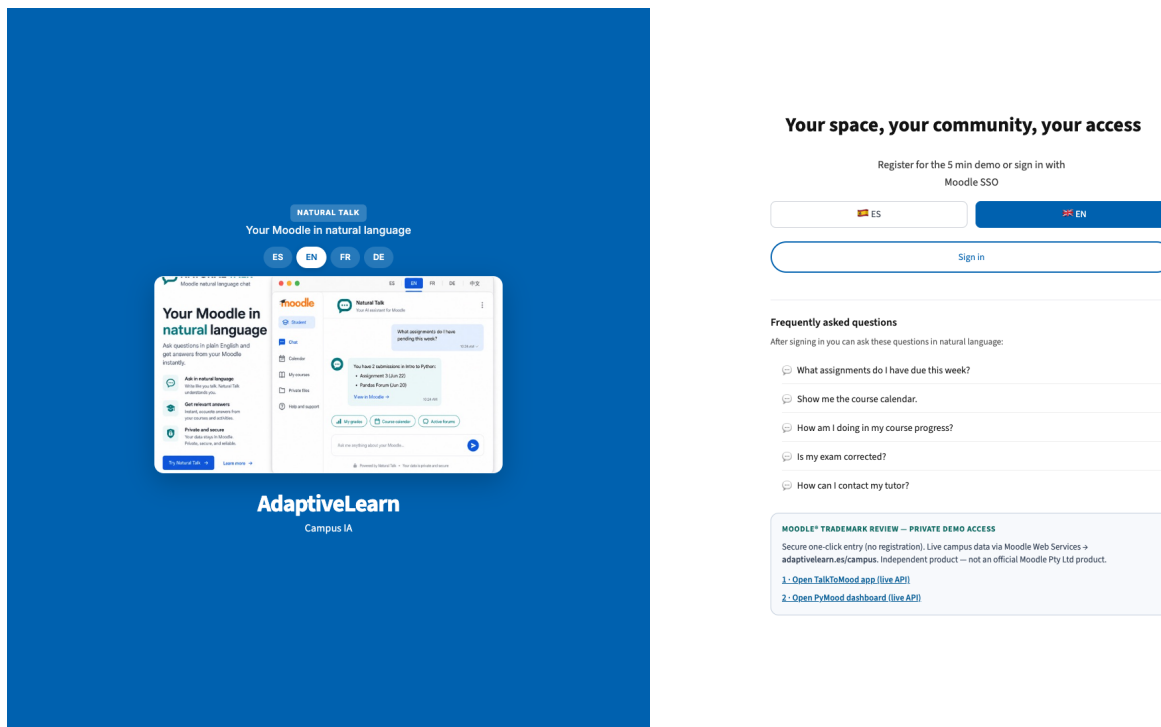

Fig. 1 — TalkToMood /app/ login with Moodle® Trademark Review private access links

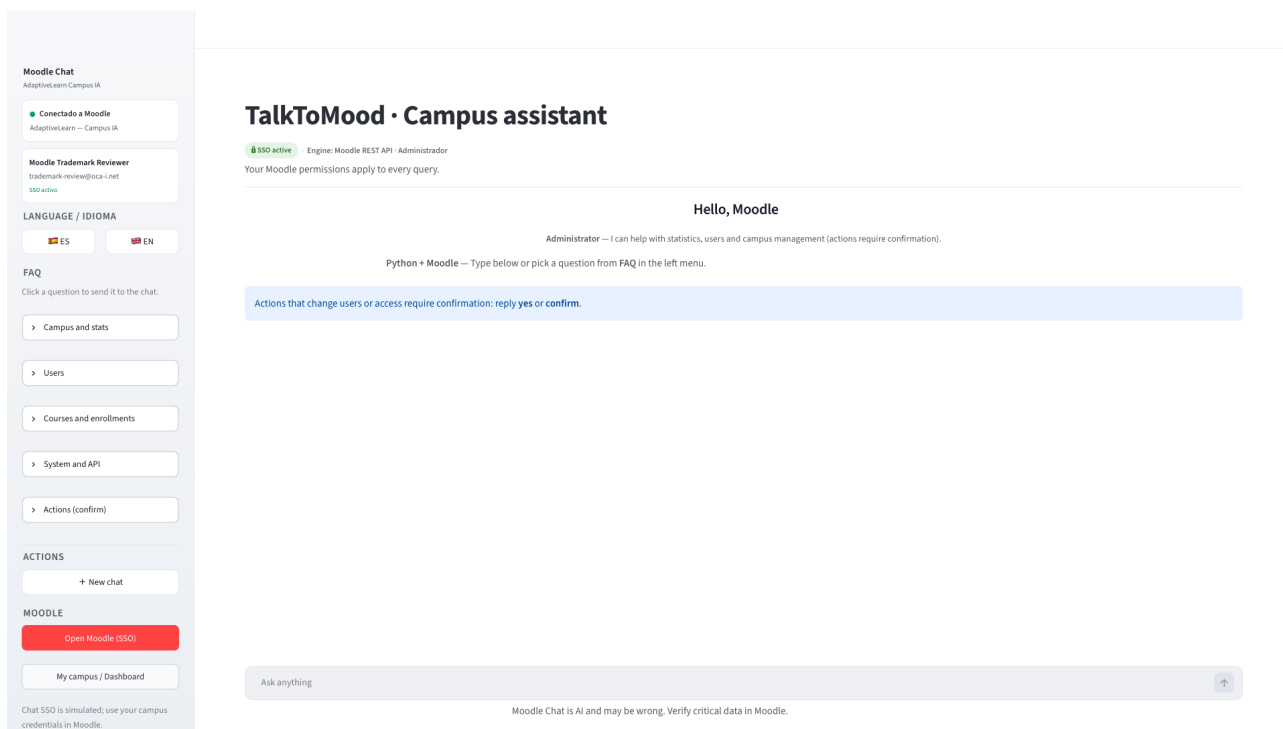

Fig. 2 — Live session: Connected to AdaptiveLearn — Campus IA · Trademark Reviewer · SSO · Moodle REST API

5. PyMood — live application

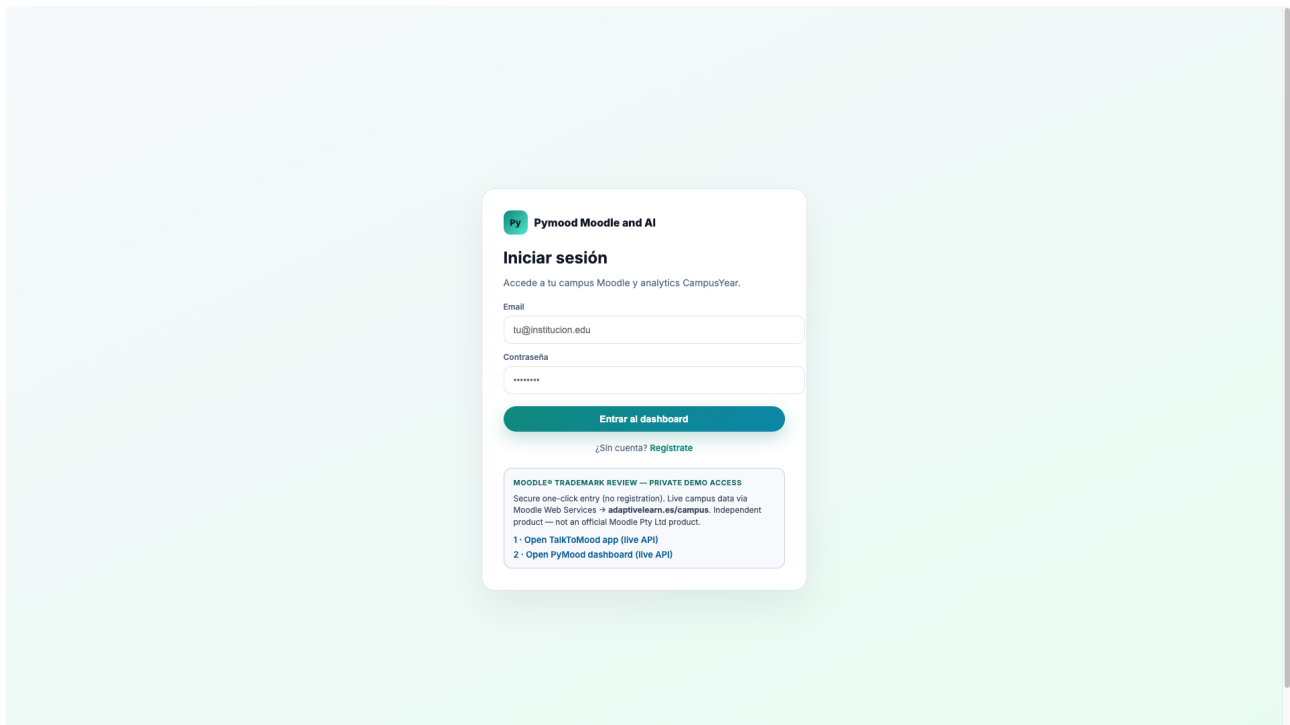

Fig. 3 — PyMood /login/?next=/app/ with the same one-click trademark review links

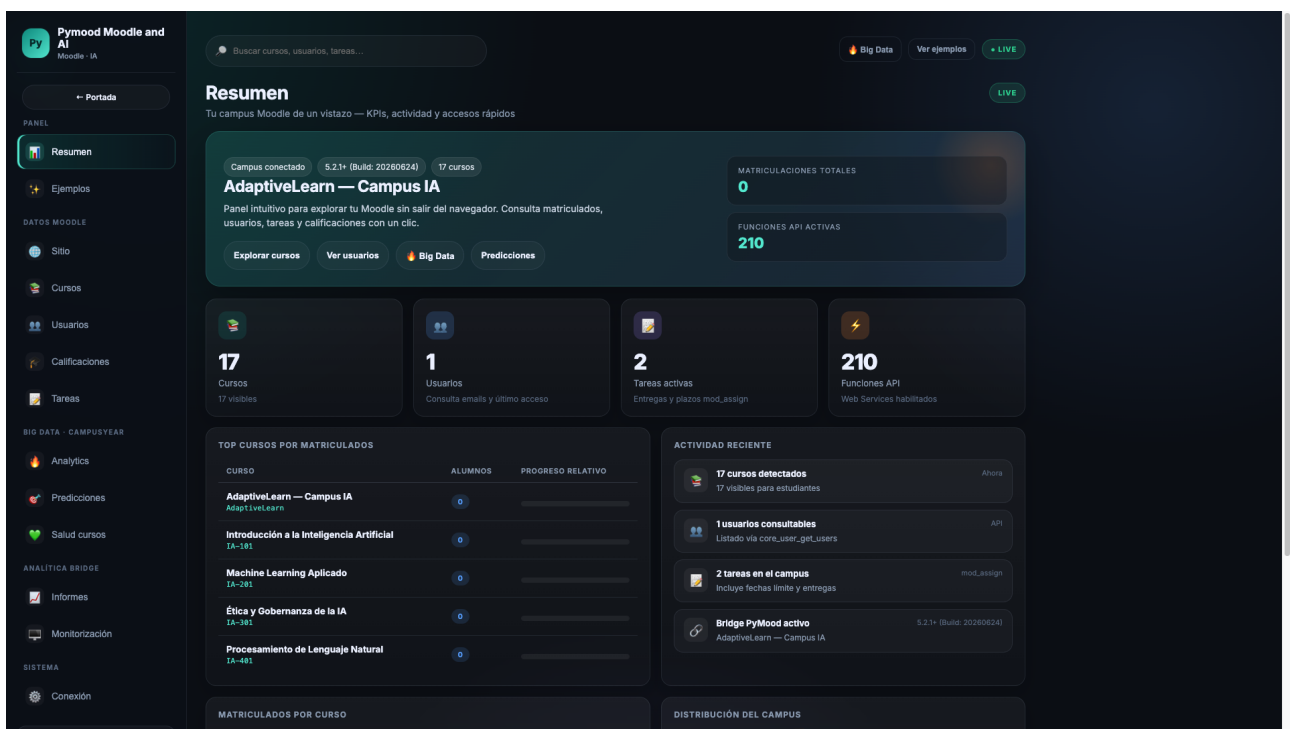

Fig. 4 — PyMood /app/ LIVE: AdaptiveLearn — Campus IA · Moodle 5.2.1+ · 17 courses · 210 API functions

6. Branding commitment

We will adjust wording, disclaimers, logo usage, or visual treatment to match Moodle Pty Ltd trademark guidelines. Access links can be rotated or revoked after the review.
